His passion for designing luxury shoes started when he made his first pair of shoes for his sister's confirmation ceremony at the age of nine. 7 years later however, he relocated to Hollywood California and got a taste of success. This brilliant man opened a shoe shop in Hollywood specializing in shoe repair and custom footwear production. These custom shoes eventually gained a surge in popularity with the celebrities of the times which eventually led him to design footwear for the cinema business. He was so well known in that regard that he nicknamed "Shoemaker to the Stars" at the time. Being the perfectionist that he was however, Mr. Ferragamo could not be fully satisfied with his products. He set forth figuring out why his designs, glamorous as they were, hurt the feet of the wearer. As such, he headed off to the University of Southern California to study the human anatomy in an attempt to solve this problem. After his 13th year in the United States, Ferragamo returned to his homeland of Italy where he continued his trade in Florence for some of the most powerful and influential women of the time. By the 1950's, Ferragamo shoes had a workforce amounting to over 700 craftsmen producing 350 pairs of hand-made Ferragamo shoes on a daily basis. By this period, Salvatore Ferragamo was widely considered a visionary in the fashion industry. Sadly, he passed away in 1960 at the age of 62. He had already revolutionized the footwear industry with numerous innovations he implemented in his designs. One of the most well-known of these innovations is the wedge heel which is essentially a form of platform heels for women. Most women agree that wedge heels are most definitely more comfortable than conventional heels and are found to provide better arch support for the wearer's foot.
